October 1, 2021

Dear Course Scheduling Committee,

Our Computer Science program has experienced disproportionate growth at all levels (UG, MS, and PhD). This has led to BCOE encountering significant difficulties in providing space for lecturers, teaching assistants, staff, and faculty.

We have invested significant effort to free 3 rooms hoping that that would suffice. Unfortunately, even with these rooms now available, BCOE is struggling to accommodate CS basic operations.

We request your help to provide at least ½ room as described in the addendum – that would allow us to soon begin needed remodeling and enable CS to fully function.

Thank you for consideration.

Christopher Lynch
